

CHAMPAGNE TOWER

DESCRIPTION

The Stellex champagne towers are perfect for receptions, events and functions. They offer a high class alternative to conventional drinks distribution.

The eye catching design complete with colour changing LED display lighting instantly attracts customers and lifts the ambience to a higher level.

The display is not just limited to champagne but can be used for other beverages and even food.

The base of the unit is mounted on castors and houses all the control gear and battery in a robust powder coated cabinet. This is cleverly concealed underneath a material skirt (not supplied).

Display shelves are made of toughened glass with bevelled edges that diffuse the LED lighting and the central column is made from mirror polished 304 grade stainless steel.

FEATURES AND BENEFITS

Feature

- Stainless steel construction
- Mirror polished finish
- Powder coated cabinet
- Battery or mains operation
- Lockable swivel castors
- Toughened glass shelves
