

BEATRIX POTTER

Once upon a time, Stellex contributed to creating a warm welcome for visitors hoping to catch a glimpse of Flopsy, Mopsy, Cottontail and Peter at The World of Beatrix Potter.

Working in partnership with a distributor, Stellex were tasked with giving the Laundry Café a fresh new look; from initial concept through to full design, manufacture and installation of a bespoke modern serving counter and fabrication through the back bar and kitchen areas.

The unique counter design echoes the recognisable blue of Peter Rabbit's coat and includes a bespoke 25mm coloured glass countertop with LED downlighting; creating a vibrant and contemporary finish that also compliments the traditional farmhouse feel of the café.

Timescales for delivery were tight and the work had to be completed during a 4-week shutdown period in January, but despite this the bespoke project was delivered on time and within budget to a very happy end user.

"To say we are thrilled with our newly refurbished café is an understatement. The space has been completely transformed; within the design we wanted to update the café to create a bright open space and a dining experience that will appeal to both new and returning customers. The whole process has been totally smooth – the attention to detail has been amazing in the short timeframe for the refurbishment."

Anita Henderson, Catering Manager

"Collaboration on site was excellent, it was a pleasure to partner with a local catering distributor to ensure that its client, The World of Beatrix Potter, received the bespoke quality look and feel that it expected from the equipment supplied."

Chris Robson, Business Development Manager, Stellex

"It's been great to be part of the refurb, with a small planning window we worked closely alongside Chris Robson, business development manager at Stellex and Matt Chubb, operations manager at the Beatrix Potter attraction."

Managing Director, Local Catering Distributor
