

BEATRIX POTTER CAFÉ

We were delighted to be invited back to the Beatrix Potter™ Museum in the Lake District and to help enhance their visitor experience. A few years ago, we completed a successful project to design, manufacture and install counters for their Laundry Café. This new project was to contribute to their latest refurbishment for the 'Peter Rabbit™ Café'.

The project focused on designing and manufacturing a bespoke front and rear bar for drinks preparation, ambient and refrigerated storage and for serving customers.

The new bar units had to align with the aesthetic and atmosphere of the refreshed room, while remaining true to the heritage and charm associated with the Beatrix Potter™ brand. To achieve this, we worked closely with the museum's team and coordinated with other subcontractors on-site to ensure the bar integrated seamlessly into the overall design.

One of the standout features of the project was the glass bar top, produced in a custom "Peter Rabbit™ Blue" finish and with LED downlighting. A whimsical yet refined detail that perfectly ties into the Beatrix Potter™ story, delighting guests and staff alike.
